PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate with strong expertise in backend systems, full-stack development, cloud computing, and compiler-based applications. Solid foundation in data structures, multithreading, DBMS, operating systems, and compiler design. Experienced in building scalable APIs, concurrent systems, AI-driven tools, and AWS cloud services. Seeking SDE internship and entry-level roles.

EDUCATION

Graphic Era Hill University, Bhimtal
B.Tech in Computer Science Engineering

Jan 2027
GPA: 8.65 / 10.0

TECHNICAL SKILLS

Languages:	Java, C, C++, Python, TypeScript, JavaScript
Core CS:	Data Structures & Algorithms, OOP, Multithreading, DBMS, OS, Compiler Design
Compiler Tools:	Lex, Parsing Techniques, Semantic Analysis
Web & Backend:	Full-Stack Development, REST APIs, Authentication
Cloud:	AWS EC2, S3, IAM, Cloud Practitioner Concepts
Databases:	MySQL, MongoDB
Tools:	Git, GitHub, VS Code, IntelliJ IDEA

EXPERIENCE

NSS Volunteer — Graphic Era Hill University

2023 – Present

- Active National Service Scheme volunteer for 3 years, contributing to social awareness and community development programs.
- Participated in cleanliness drives, educational outreach, and leadership activities fostering teamwork and responsibility.

KEY PROJECTS

• AyuNet – Telemedicine Platform

[GitHub](#)

- Built a full-stack telemedicine platform with AI-based symptom analysis and role-based portals.
- Designed normalized SQL schemas and scalable backend workflows for consultations and records.

• Source Code Plagiarism Detector (Compiler-Based Project)

- Developed a plagiarism detection system for source code using compiler design principles.
- Applied lexical analysis, token comparison, and syntax-based similarity detection.
- Utilized C and Lex to analyze and compare program structures efficiently.

• Multithreaded Web Server

[GitHub](#)

- Implemented a Java-based HTTP server using socket programming and multithreading.
- Improved request throughput through concurrent client handling.

• Gesture Pointer

[GitHub](#)

- Developed a computer vision-based system to control mouse operations using hand gestures.
- Implemented real-time gesture recognition using Python and OpenCV.

LEADERSHIP AND ACTIVITIES

- Head of Design, World Webs Club — Led UI/UX initiatives for technical projects and events.
- Head, Student Placement Committee (GEHU) — Coordinated placement operations for 500+ students.
- Managing Director, Astroverse Club — Organized workshops and university-level hackathons.

HACKATHONS AND COMPETITIONS

Participated in SIH Internal Hackathon, NASA Program Hackathon, Astroverse Hackathon, Tech Aarambh 2.0 National level Hackathon (Finalist) and Unstop hackathons (Tata Steel, Reliance, NETC).

CERTIFICATIONS

AWS Cloud Practitioner Essentials
AWS Cloud Quest (Compute, Storage, Security)
NPTEL: Data Structures and Algorithms, DBMS, Cloud Computing, AI
IBM Python for Data Science & Generative AI (Google)

COMPETITIVE PROGRAMMING

Solved **250+ problems on LeetCode**; active practice on Codeforces, HackerRank, and other competitive platforms.
